

couple problems ive encountered

Posted by t3h anarchist - 2009/03/25 07:01

there are two major problems i have encountered in the last few months

number 1: after you write a review, if you accidentally enter the wrong captcha words, then it just blanks out and you have to rewrite the whole review

number 2: not all forum posts are displayed on the new posts section of the home screen

Thanks for notifying me about these problems.

#1: I just discovered that you don't lose your review nor ratings in Internet Explorer, but you do in Firefox.

#2: I'm aware of this one. I'll have to do some upgrades to the database and forum software at some point to get it fixed.
