

How to use cleaners

Posted by petedogg629 - 2008/06/14 22:21

I recently bought the Butterfly Rushawa rubber cleaner and the rubber care sponge with the blue side and the yellow side. Im just wondering what is the correct way of using the cleaners. Do i spray the cleaner and wipe with yellow side and let it dry naturally or what

Yes, that's the way to use it! But I do think you're better off using water..

um im pretty sure there is no "correct" way to use a cleaner, i spray mine on rubber and wipe it with a sponge, but your way should work fine too
