

Iolite (Butterfly)

Posted by JLL - 2008/02/13 03:52

This thread discusses the Content article: Iolite (Butterfly)

I thought it was pretty light since you said the handle was small. :dry:

A '5' for weight just means that I really like the weight. (You can see what the rating means if you go to 'write a review' - just hover the mouse over the (i) symbol next to the 'Weight' rating.)

That's OK, it's more a problem that the site doesn't explain what some of the ratings mean unless you're in the review form.

I should put those (i) symbols (tooltips) in the actual product pages too.
