

Half ratings are now allowed

Posted by admin - 2008/02/15 07:08

Following a comment on an Italian forum that criticized this site for having a scale of only 1-5, I changed the scale to allow 1/2 ratings, giving 10 possible values now.

At first I thought that 1-5 was enough, but if you're comparing two rubbers for spin, let's say, and they're quite close but you can tell a difference, then a finer scale definitely comes in handy.
