Voting on reviews is now supported
Posted by admin - 2008/03/03 20:40

_____

You can now vote on every review to let us and other people know whether the review was helpful to you or not.

If you are a good reviewer and a registered user, then this will help you in the future ;)

_____

Nice feature.
Is it possible to disable voting on your own review?

_____

Thanks.

That would be rather tricky, because you don't have to be logged in to vote. Currently I'm disallowing duplicate votes from the same IP address. It's not too serious if people can vote once on their own review, anyway.
